

Adding a Random Block Question to a Test

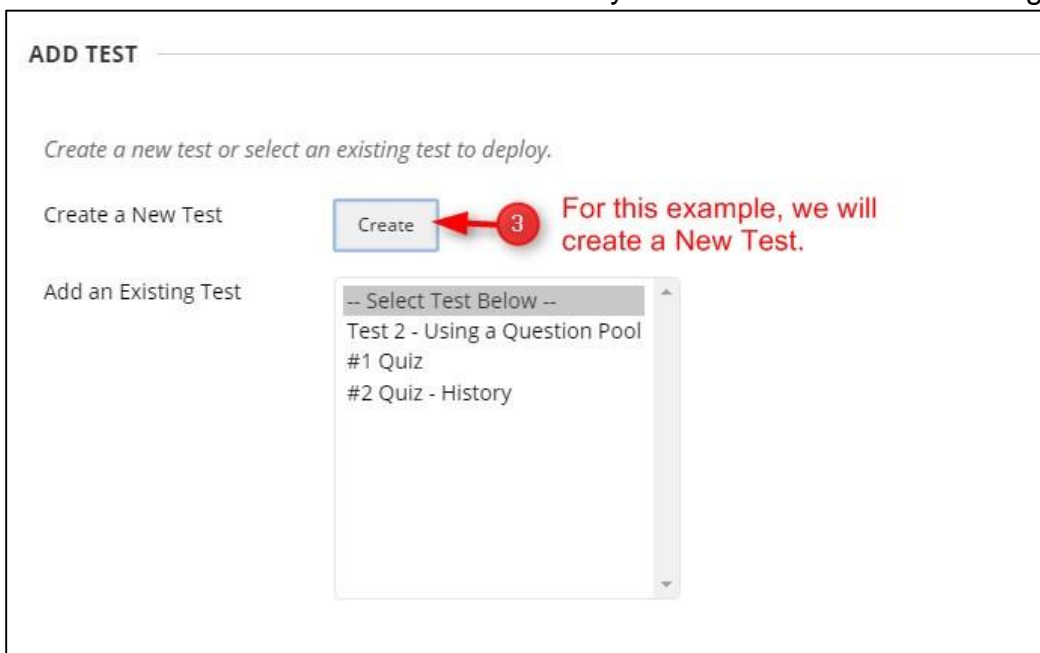

Random blocks draw questions from pools only. You can use more than one pool to draw your questions from. You choose the number of questions to show from the random block to show. For example, you can show 3 questions out of 50. The questions are then randomly distributed so that each student sees a different set of 3 questions. You can show students all of the questions in the random block. Questions are randomized for each student.

Directions:

1. Click **Assessments**
2. Click **Test**

3. Click **Create** to create a New Test. **NOTE:** you can also link to an existing test.

4. Type the **name** of the test, add the **description** and **instructions**.

* Indicates a required field.

TEST INFORMATION

* Name **A**

Description **B**

The description is visible to students before they click on the link to take the test.

Path: p Words:0

Instructions **C**

Instructions appear when the test is launched.

5. Click the **Submit** button.

6. Click Reuse Question and then Create Random Block

Test Canvas: Chapter 1 Test ▼
The Test Canvas allows you to add and edit questions, add question sets or random blocks, reorder questions, and review the test. [More Help](#)
