

## Adding Video

You have a couple ways of adding videos. **Please do NOT upload video files to Blackboard.** For accessibility purposes, videos need to be uploaded to a media server such as YouTube or Ensemble and then embedded into Blackboard.

### How to Add a Video:

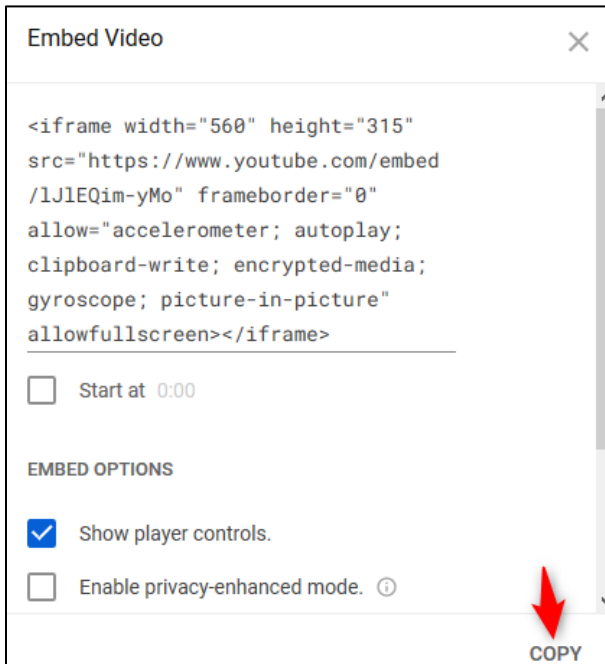

1. Click on **Build Content**
2. Click on **Blank Page**

3. Name your page and click on the **Source Code** icon

A screenshot of the Blackboard page editor interface. At the top, there is a text input field for the page name, containing 'Chapter 5 Lecture Videos'. A red arrow points from the text 'Page name' to this field. Below the name field, there are options for 'Color of Name' (set to Black) and a 'Text' section with a rich text editor toolbar. The toolbar includes various icons for text formatting, alignment, and insertion. A red arrow points from the text 'Source Code' to the source code icon (represented by a code symbol &lt;code&gt; in a square) in the toolbar. At the bottom of the editor, it shows '0 WORDS POWERED BY TINY'.

4. Go to the video and **copy the embed code.**

5. Go back to Blackboard and **paste the code** into the Source code window and **Save**.

6. Set any desired standard options and click on **Submit**.
