How to use the Canon PowerShot SD10000 Digital Still Camera

1. The digital camera is a Canon PowerShot SD10000 Digital ELPH. The Digital Still Camera incorporates a 3x zoom, and 7.1 mega-pixels. The Digital Still Camera comes equipped with a manual (basic, advance, printer user guide) bag, battery/battery charger, 2GB memory card, USB cable for picture transfer, and a RCA cable.

2. The digital camera is a plug-n-play device and no software is needed for transferring pictures to the computer. A memory card reader can also be used to transfer pictures to the computer. Additional software may be needed to edit the pictures. The Help Desk does not provide the additional software.

Frequently Asked Questions:

How do I take a picture? See Figure 1:
1. Press the power button
2. Switch the selector to the camera icon.
3. Press the shutter fully to take the picture.

How do I review a picture?
In order to review a picture (Figure 2):
1. Switch the selector to the playback icon.
2. Press the left and right arrow to toggle through pictures.

How do I get the picture off of the camera?
In order to transfer the picture off the camera (Figure 3):
1. Connect the USB cable to the PC and the camera
2. Slide the camera mode switch to playback and turn on the camera
3. Depending on your camera you might need to download drivers (see manual)
Once the camera is connected to the computer you should see a popup window (Figure 4):

- If you have any photo editing software such as Adobe Photoshop this software can retrieve the pictures from the camera by selecting the program.

If you do not have any software the pictures can be retrieved by going to My Computer and selecting the Canon PowerShot SD1000 located under Scanners and Cameras (Figure 5):

This concludes this FAQ.
