How to Use Compatibility View in IE8

If you’ve tried to use ANGEL in Internet Explorer 8 (IE8), you know it doesn’t work well. To combat that problem Microsoft has added a Compatibility View button in IE8 to support websites which are best viewed in older versions of IE.

Below are instructions on how to add ANGEL to Compatibility View in IE8 for best viewing.

1. Open Internet Explorer.

2. Go to the ANGEL login page. Select the URL in the Address Bar. Copy the address.

   To copy:
   
   Ctrl+C
   
   or
   
   Right-click and choose copy from the pop-up menu

3. Choose the Tools option from the IE8 Menu Bar.
4. From the Tools dropdown menu, choose **Compatibility View Settings**.

5. In the new pop-up window, **paste** the ANGEL URL into the **Add this website** box.
6. The Web site name will display in the “Websites you’ve added to Compatibility View” box.

7. Now, when navigating to ANGEL, it will automatically come up in Compatibility View. You’ll see the Compatibility View icon in the Address bar.
