Stark State College of Technology KPI Report, February 2019

**Definitions**

Cohort	Definition
Fall FTEIC students	Students who enrolled for the first time in postsecondary education (no previous college credits or degrees) in at least one credit course (developmental or college-level, but excluding non-credit offerings) at your college during the given fall term, tracked through the following summer term ( <u>academic year from fall through lagging summer</u> ). This includes all full- and part-time students as well as non-degree/certificate seeking students. <u>Students who were “dually enrolled” at your college and in high school previously and in the given term were excluded.</u> The SE file was used to identify students for each fall cohort who had a first-time-in-college flag for a given fall term, admission area of undergraduate, and matched to the CN file.
